SUMMARY

Full-Stack Product Engineer with **3+ years** of experience building **AI-powered, SaaS, and real-time applications** from **idea to deployment**.Proficient in **Next.js, React, TypeScript, Node.js, Python (FastAPI), PostgreSQL, MongoDB, and AWS (EC2, S3, RDS)**, with hands-on experience deploying and managing production infrastructure using **Docker, Nginx, Linux, and CI/CD pipelines.** Proven track record of **collaborating directly with founders, leading engineering teams**, and shipping **secure, scalable, production-ready software** for clients across the **UK, US, Africa, and India.**

WORK EXPERIENCE

Freelance Full-Stack Product Engineer **Aug 2023 - Present**

Designed, built, and deployed **AI-powered, SaaS, Web3, e-commerce, travel, real estate, and EdTech applications** for startups and businesses across the **UK, US, Africa, and India.** Led **engineering teams** while owning the complete **software development lifecycle**—from requirements gathering and system architecture to deployment, scaling, and ongoing maintenance.

EduMetrix Limited | Learning Management System (LMS)

Founding Full-Stack Engineer

- Architected and developed a **multi-tenant Learning Management System (LMS)** from **concept to production,** serving **500+ active users** through dedicated administrator, teacher, and student portals.
- Designed and implemented **200+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, enabling role-based authentication, academic workflows, attendance tracking, lesson planning, homework management, and fee/salary operations across the platform.
- Developed **responsive, pixel-perfect frontend applications** using **React, Redux, and Material UI**, optimizing usability, performance, and accessibility across administrator, teacher, and student portals.
- Integrated **Google Meet and Google Calendar APIs** to automate scheduling and support **100+ live classes** conducted weekly, streamlining virtual learning operations.
- Built **Socket.io-powered real-time messaging** and **notification** features, enabling seamless collaboration between administrators, teachers, and students.
- Deployed and managed the production application on a **Linux Hostinger VPS** using **Nginx, Cloudflare, and SSL**, maintaining **99.95% uptime** while ensuring secure, scalable, and reliable application delivery.

Go Unique Journeys | Travel Booking Platform (UK)

Founding Full-Stack Engineer

- Led a team of **4–5 engineers** to architect, develop, and launch a **production-ready travel booking platform**, delivering dedicated customer, employee, administrator, and **CMS portals** for booking and content management.
- Architected and built **300+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, powering authentication, travel bookings, payment processing, itinerary management, and content management services.
- Engineered responsive, production-grade frontend applications using Next.js, React, TypeScript, and Redux, delivering a seamless experience across **4 role-based dashboards.**

- Managed production infrastructure on a Linux Hostinger VPS using **Nginx, cPanel, and SSL**, while integrating an **AI chatbot** to automate customer interactions and support real-time booking workflows.

Linked Bricks | Real Estate Platform (UK)

Founding Full-Stack Engineer

- Built a **production-ready real estate platform** with dedicated buyer and administrator portals, enabling property discovery, lead management, and **Stripe-powered** online transactions.
- Delivered **100+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, powering authentication, property listings, Stripe payment processing, real-time messaging, and content management.
- Implemented responsive, production-grade frontend applications using React, Redux, and Axios, delivering a seamless user experience across **2 role-based portals.**
- Integrated **Google Maps, Stripe,** and **Socket.io** to enable interactive property discovery, secure online payments, and real-time messaging between buyers and agents, while translating **Figma designs** into responsive, pixel-perfect user interfaces.

Enteka Shop | E-commerce Platform

Founding Full-Stack Engineer

- Delivered a **production-ready e-commerce platform** with dedicated customer and administrator portals for product catalog, order, and user management.
- Engineered **150+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, powering authentication, product catalog, shopping cart, checkout, order management, and secure payment workflows.
- Crafted responsive frontend applications using Next.js, React, and Redux, integrating **Stripe** for secure payment processing and delivering a seamless shopping experience.

Software Developer | Screenplay.ink **Nov 2024 – Apr 2025**

- Architected and implemented a **blockchain-powered screenplay protection system** using **Solidity** and **Truffle**, enabling secure registration, encryption, and ownership verification of screenplays through immutable **smart contracts** and blockchain-backed ownership certificates.
- Built **real-time collaboration** features using **Socket.io** and **WebRTC**, enabling live messaging and video calls directly within the screenplay editor.
- Engineered **50+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, powering authentication, AI co-writing, screenplay security, chat, video calls, and payment processing.
- Developed responsive frontend applications using React, TypeScript, React Context API, Web3.js, and Axios, seamlessly integrating **blockchain smart contracts** and backend services while translating Figma designs into production-ready user interfaces.

Full-Stack Developer | Sharpener Tech **Aug 2022 – Jun 2023**

- Engineered **100+ production-ready RESTful APIs** using Node.js, Express.js, and MongoDB, integrating seamlessly with React.js, Redux, and Axios while **reducing backend response time by 35%.**
- Built and optimized MongoDB database schemas to improve application performance and scalability, while conducting **15+ technical mock interviews** to mentor aspiring software developers.

React Web3 Developer | Centrelocus (eSrot Labs) **Dec 2021 – May 2022**

- Built a **decentralized NFT marketplace** using React.js, Redux, Web3.js, Material UI, and Firebase Firestore, implementing MetaMask authentication and responsive user interfaces.
- Integrated **Ethereum smart contracts** and **GraphQL NFT APIs** using **Web3.js**, enabling real-time blockchain interactions and seamless NFT marketplace functionality.

SELECTED PROJECTS

Sentinel — AI Risk Intelligence Dashboard **DEMO**

- Built a **real-time AI-powered geo-risk intelligence platform** featuring **global risk visualization**, live event streaming, **AI Operational Copilot**, predictive forecasting, scenario simulation, and explainable risk scoring to support operational decision-making across multiple regions.
- Implemented **WebSocket-powered live event streaming**, multi-view dashboards (2D Map, 3D Globe, Network Graph), and Claude-powered analytics with streaming responses for real-time situational awareness.

Tech: React, TypeScript, Python (FastAPI), WebSockets, Leaflet, Anthropic SDK (Claude)

Prepvera — AI-Powered SAT Preparation Platform **DEMO**

- Built an **AI-powered SAT preparation platform** featuring **adaptive diagnostics**, personalized learning paths, AI tutoring, answer explanations, score prediction, and real-time progress tracking, delivering a personalized exam preparation experience powered by **Claude AI.**

Tech: Next.js, TypeScript, Zustand, Tailwind CSS, Anthropic SDK (Claude)

FrontDesk AI — AI Employee Platform

- Built an **AI-powered operations platform** that acts as a **virtual front-desk employee** for service businesses, handling **real-time voice and chat conversations**, appointment scheduling, customer management, **workflow automation**, and analytics. Extended the platform with a dedicated **real estate edition** featuring AI-powered lead qualification, property search, viewing management, and CRM workflows.
- Implemented **speech-to-speech AI**, tool-calling, durable workflow orchestration, streaming conversations, and real-time communication using a modular, production-ready architecture.

Tech: Next.js 15, TypeScript, PostgreSQL, Prisma, LiveKit, OpenAI Realtime API, Inngest, Docker.

TMS Admin — Fleet & Logistics Management Platform **DEMO**

- Built a **full-stack fleet and logistics management platform** featuring vehicle, driver, route, and analytics management with scalable **REST and GraphQL APIs.** Designed a production-ready admin dashboard with **real-time fleet tracking** and **role-based access control,** enabling secure management across multiple user roles.

Tech: React, Node.js, Express.js, GraphQL, TypeScript, Modular Architecture

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, Solidity
- **Frontend**: React.js, Next.js, Redux, Zustand, HTML5, CSS3, Tailwind CSS, Material UI
- **Backend**: Node.js, Express.js, FastAPI, GraphQL, REST APIs
- **Databases & ORM**: PostgreSQL, Prisma ORM, MongoDB, MySQL, Firebase
- **AI & Real-Time**: OpenAI Realtime API, Anthropic (Claude), LiveKit, WebSockets, Socket.io, WebRTC
- **AI Tools**: Claude Code, GitHub Copilot, ChatGPT, Gemini
- **Cloud & DevOps**: Docker, AWS (EC2, S3, RDS), CI/CD, Nginx, Cloudfare, Git, GitHub
- **Blockchain**: Solidity, Web3

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) **Jul 2019 - Jun 2022**

University of Mumbai **CGPA:** 9.5 / 10
